

Check if a folder exists or not. If it's not present, create it

- a) Test if particular folder exists in current directory or not
- b) If its doesn't exists then create it else print "folder already exists.."

```
a="practice"
if [ -d $a ];then
echo " folder exist"
else
echo "folder doesnot exist"
if [ ! -d "$a" ];
then
mkdir -p "$a" && echo " now we create for you"
fi
fi
```
